PERS

A PERS is a Personal Emergency Response System these systems are helpful for anyone who needs to be able to summon help at any time.

These systems provide 24 hour/7 day a week telephone access to PALS (patients with ALS).

The PALS wears a signaling device and provides the service with a list of phone numbers. The operator will ask if 911 assistance is required. If not, the operator will connect the PALS to anyone on the provided phone list.

There are many companies that provide this service, but there is one company that provides a discount for PALS.

American Medical Alert provides a 15% discount, if you ask for the Special ALS rate.

You can contact American Medical Alert at 1-800-286-2622 or www.amac.com

PLEASE NOTE: If the PALS cannot push the regular button on the activator, it can be adapted for alternate access.
